

Our team needs Life Design!

What is Life Design?

Life Design is a methodology rooted in strategic innovation and design thinking. Life Design Circle (LDC) uses digitized design tools and a structured agile process to guide individuals through a creative process of self-discovery. The aim is to empower them to reach clarity on their life goals. With a unique holistic approach, Life Design considers both personal and professional life balance.

How can we use it?

LDC offers three standard offerings - a 90min interactive talk on the foundations of life design, 4h intro hybrid workshop for a taste in applied life design, and a 15h in-depth program called the Life Vision Workshop Journey. All three services are offered fully online or hybrid. There are also customized services if our organization needs tailor-made solutions.

What do we need?

LDC currently works with organizations, unions and small businesses. An unlimited number of our members/employees we can inspire with the Interactive Talk, up to 15 people we can activate with a 4h hybrid workshop, and shall we dive in-depth into our personal Life Vision over a few weeks time, we need a Life Vision Journey.

All Services: <https://www.lifedesigncircle.co/fororganizations>
